Summery

Data analyst with 5+ extensive experience in data analysis, interpretation, and visualization. Proficient in SQL, Python, Power BI and Tableau, with a strong understanding of statistical analysis and data modeling. Experienced in gathering business requirements, cleansing data, and deriving actionable insights to drive decision-making.

- Apply data analysis and software development skills to research, develop, and implement business intelligence, analytics, or reporting functionality. Make use of databases, programming languages, and business intelligence platforms or reporting tools to manipulate, extract, and organize data for intended purposes.
- Worked as key Team Player, leading the team in designing and implementing the BI application using Tableau and Power BI
- Proficient in understanding and analyzing Business structure and Impact.
- Integrated with cloud ecosystems (AWS S3, Glue, Lamda, EMR, Anthena **)** and handled large volumes of structured andsemi-structured data, ensuring efficient ingestion, transformation, and reporting.
- Leveraged Python (pandas, NumPy, SQL integration) to clean, transform, and validate large datasets and prepare analytics-ready datasets for Tableau and Power BI dashboards.
- Strong skills in database design, re-engineering, SQL Query Tuning and Programming using SQL, NO SQL
- As a Tableau SME, responsible for the design, development and production support of interactive data visualizations used across the company.
- Optimized SQL queries and Azure resources to improve reporting and analytics performance.
- Quantify and relate structured and unstructured data according to project, model, platform-specific, or research needs
- Analyze and obtain insights into large datasets by creating visually compelling and actionable dashboards or interactive reports
- Experience in various phases of Software Development Life Cycle (SDLC) like Project Requirement Study, High Level Design, Low Level Design, Coding, Testing and Implementation.
- Strong understanding of project life cycle and SDLC methodologies including Waterfall and Agile.
- Provide technical support, troubleshooting, report design, and monitoring of system usage in enterprise environments
- Knowledge and worked in Agile teams and Certified in Scaled Agile Framework (SAFe) as Team Member.
- Experience in Data Warehousing and ETL Technologies. Strong understanding of databases (SQL server) and windows/Linux s
- Good communication and Client Interfacing Skills/Quick Learner.

TECHNICAL SKILLS:

BI Tools:	Tableau (Server & Desktop), Power BI, , Adv MS Excel
Programming:	Python, SQL, C++, R, Java Scripting,C#, Java
Databases:	SQL Server, NO SQL
Operating Systems:	Windows, Linux (RHEL, CentOS)
Cloud Platforms:	AWS (EMR, S3, Glue, Sage Lamda, Anthena), Azure (Databricks, Data Lake,Synapse),Docker,Pytorch
Web Technologies:	HTML, JavaScript, React. Js , Next.js, Cypress, Selenium

Educational Details

M.S. in Data Science
University of Massachusetts Dartmouth | May 2025

B.Tech. in Information Science & Engineering
Jain University, India | Aug 2021

PROFESSIOANL EXPERIENCE:

Ascension Health, WI March 2025 – Present
Data Analyst

- Designed and implemented a comprehensive data visualization strategy using Tableau and Power BI, enhancing reporting capabilities and streamlining business intelligence processes.
- Developed highly interactive dashboards in Power BI with optimized DAX, Developed highly interactive dashboards in Power BI with optimized DAX Implemented Row-Level Security (RLS) and security mapping tables across Power BI.
- Built complex backend logic in SQL and Python for consecutive/non-consecutive gap analysis, rolling 12-monthtracking, and advanced metrics, keeping calculations efficient and outside the reporting layer.
- Led the integration of multiple data sources into Tableau and Power BI, optimizing data access and ensuring seamless data flow between various platforms, including SQL databases and cloud-based solutions.
- Developed and deployed interactive dashboards and reports to track key performance indicators (KPIs) and business performance metrics, improving decision-making efficiency.
- Optimized SQL queries and Azure resources to improve reporting and analytics performance.
- Integrated and automated data pipelines from multiple sources (AWS NO SQL, S3, EMR, Lambda, Antena, Excel) using Tableau Prep, Alteryx, and Informatica for real-time and scheduled refreshes.
- Created and optimized data models using SQL, ensuring accurate and efficient data extraction, transformation, and loading (ETL) processes to support reporting and analytics.
- Served as the subject matter expert (SME) for both Tableau and Power BI, providing training, support, and guidance to cross-functional teams and end-users across the organization.

University of Massachusetts Dartmouth Aug 2024 – Dec 2024
Data Analyst

- Led requirements gathering sessions with stakeholders and translated business needs into comprehensive reporting solutions.
- Analyzed historical CPU, memory, and network usage metrics using Python.Tableau
- Utilized SQL and Python for data extraction, cleansing, and analysis, ensuring data accuracy and integrity.
- Analyzed transactional data and identified distinct customer segments to tailor marketing strategies.
- Conducted exploratory data analysis (EDA) to uncover trends, patterns, and correlations in large datasets.
- Developed interactive dashboards and reports in Tableau, providing stakeholders with actionable insights.
- Collaborated with cross-functional teams to gather business requirements and translate them into data-driven solutions.
- Implemented predictive modeling techniques to forecast trends and inform strategic decision-making processes.

Carelon Global Solution, Bangalore, India **Sep 2020 – Aug 2023**
Data Analyst

- Conducted data analysis of user engagement data to optimize advertising campaigns.
- Developed Python scripts to automate data extraction and preprocessing tasks.
- Utilized AWS services such as Amazon Web Services S3, Glue, Athena,for data storage, processing, and analytics.
- Integrated Power BI with SQL databases and data warehouses to support real-time and historical reporting.
- Created advanced visualizations in Tableau to illustrate key performance metrics and trends.
- Collaborated with data engineers to optimize data pipelines and improve data quality.
- Presented findings and recommendations to senior management to support decision-making processes.
- Collaborated with product development teams to optimize user experiences and drive user engagement, resulting in a 20% increase in daily active users (DAU) within three months.
- Provided ad-hoc data analysis and support to business functions, leveraging advanced analytical techniques to uncover insights and drive strategic initiatives.
